PEMTI DL 2

NETGroup

Portable Energy Meter Test Instrument and Data logger

Domestic electricity meter audits form an integral part of revenue protection and management, which in turn is crucial for sustainable service delivery.

Features:

- Test all conventional and pre-paid meters.
- Fully computerised system to test meters for accuracy (1%), earth leakage, polarity, tripping circuit etc.
- Direct downloading from Pemti to PC by means of a serial interface (RS232)
- GPS—Automatically captures Long/Lat (NMEA allows real time GPS).
- Various checks and balances to ensure accuracy of tests and data collection.
- Process driven by computer to ensure no fraudulent meter audit occurs.
- Bar code reading if required.
- SABS calibrated
