Substation Design

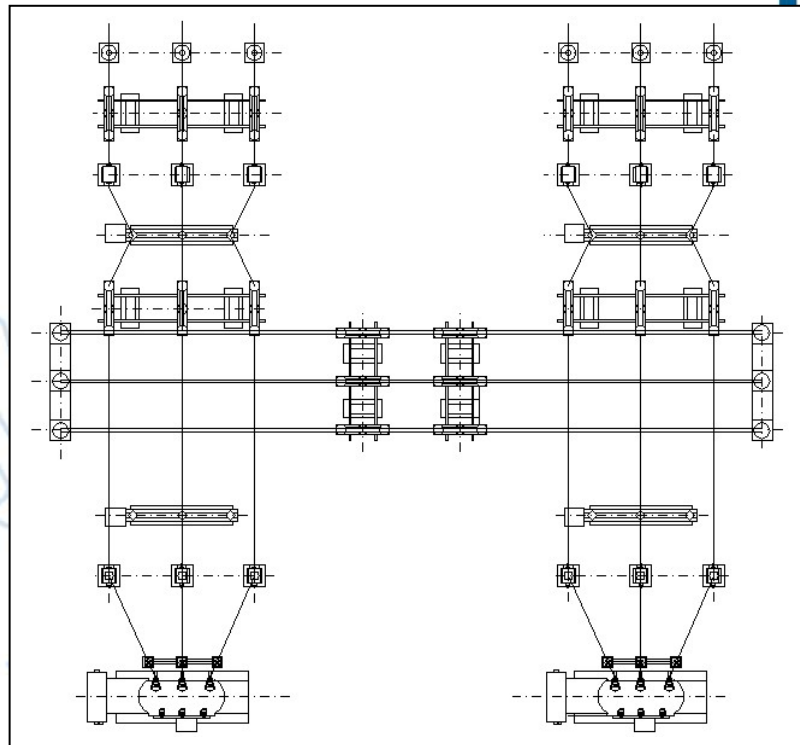

NETGroup Solutions provides a complete substation design service addressing substations from 33/11kV through to the 132/33kV range.

The service includes:

- Electrical design
- Protection and Control
- Civil Design
- Project Implementation
- Commissioning services

Client Base:

- Local Councils
- Eskom
- Sasol
- De Beers
- EDM (Mozambique)
- SEB (Swaziland)

Service Features:

NETGroup employs modern technology and CAD backed design tools to provide world-class outputs.

Specialised design activities include:

- Earthing design
- SACDA integration
- Insulation coordination
- Reliability analyses
